Improving Options.
Renewing Hope.

Medicines^{AP}

The Medicines Access Portal (MAP) is a single, secure online portal where clinicians and oncology pharmacists can view the special access programs that pharmaceutical companies have available for cancer patients in Australia. The MAP is approved and endorsed by the TGA and Medicines Australia Code of Conduct.

The benefits of this are twofold. Busy clinicians can have improved awareness of – and easy access to – special access programs that are not publicly advertised and time consuming to uncover individually. But most importantly, it means patients can access potentially lifesaving medications, which at the very least, may help to buy them just a little more time.

If you have any questions, please contact map@rarecancers.org.au.

To access the MAP scan this QR code.
